

EMPATHY MAP

DATE	29 September 2026
TEAM ID	SWTID-2026-1812
PROJECT NAME	Comic craft Ai comic story creater using gemini modals
MAXIMUM MARKS	4 Marks

Definition

An Empathy Map is a simple user-centered design tool used to understand the thoughts, feelings, actions, and expectations of the target user. It helps the development team understand the user's experience from the user's point of view. By analyzing what the user **Says, Thinks, Does, and Feels**, the team can identify the user's needs, problems, motivations, and expectations. This information helps in designing a solution that is useful, simple, and user-friendly.

Empathy Map for ComicCraft

Person

Target User: Students, beginners, casual users, and non-artists who want to create comics easily without requiring advanced drawing or technical skills.

Says

- "I want to create a comic from my own story idea."
- "I don't know how to draw comic characters."
- "Creating each comic panel manually takes too much time."
- "I want the comic creation process to be simple and easy."
- "I would like to see the generated comic before downloading it."

Thinks

- The user thinks that creating a complete comic manually requires drawing and technical skills.

- The user wonders whether AI can convert a simple story idea into a complete comic.
- The user expects the generated story and images to match the given prompt.
- The user wants an easy interface without complicated steps.
- The user thinks that downloading the final comic as a PDF would be useful.

Does

- Enters a story prompt and character details.
- Selects the required setting, tone, and art style.
- Generates the comic using the application.
- Views the generated story, dialogues, and comic panels.
- Checks the comic preview and downloads the final comic as a PDF.

Feels

- **Curious** about creating a comic using AI.
- **Excited** to see the story idea converted into comic panels.
- **Concerned** about the quality and relevance of the generated content.
- **Satisfied** when the generated comic matches the given requirements.
- **Confident** when the application provides a simple and clear creation process.

Conclusion

The Empathy Map shows that the target users need a simple and accessible way to transform their creative ideas into comics. ComicCraft addresses these needs by combining AI-generated story content, dialogues, images, preview, and PDF export in one application. This user-focused understanding helps the team design ComicCraft according to the actual needs and expectations of its users.
