

PROBLEM–SOLUTION FIT CANVAS

DATE	29 September 2026
TEAM ID	SWTID-2026-1812
PROJECT NAME	Comic craft Ai comic story creater using gemini model
MAXIMUM MARK	5 Marks

Section	Details
Problem	Creating a complete comic story requires writing, character development, dialogue creation, illustration, and page design skills. This process can be time-consuming and difficult for beginners and non-artists.
Target Users	Students, beginners, content creators, casual users, and non-artists who want to create simple comics easily.
Existing Challenges	• Difficulty in developing a structured comic story • Lack of drawing and illustration skills • Time-consuming manual comic creation • Need to use multiple tools for text, images, and PDF creation
Proposed Solution	ComicCraft is an AI-powered web application that converts a user's story idea into a structured comic. It generates a story outline, narration, dialogue, comic-panel images, preview, and downloadable PDF.
Key Features	• AI-based story generation • Character and setting-based prompts • Automatic dialogue and narration

- AI-generated comic images
- Comic preview
- PDF export and download

Value Proposition

ComicCraft provides a simple and integrated way to create comics without requiring advanced writing, drawing, or design skills.

Expected Outcome

Users can quickly transform a simple story idea into a structured and visually engaging comic that can be previewed and downloaded as a PDF.

Success Measure

Successful generation of a complete multi-panel comic with story content, dialogue, images, preview, and PDF export from a single user prompt.
